

The image is a vertical collage. The top half shows a dense forest with sunlight filtering through the trees. The middle section features a wide waterfall cascading into a pool of water, with a wooden walkway visible in the background. The bottom section shows a group of people sitting on a paved area near the waterfall; a woman in a pink shirt is smiling towards the camera. The entire collage is overlaid with a grid of vertical bars in various colors, including purple, blue, green, yellow, and red, creating a digital or data-like aesthetic.

Bachelor of Business and

Bachelor of Business and Environmental Science

✔ Learn how to manage profit, policy and conservation. Develop an in-depth theoretical knowledge of sustainability and the effects of humans on the climate.

✔ Learn how to critically appraise the role and relevance of environmental science in global and local business practice and society.

Take on the important and challenging work of balancing profit, policy, and conservation with the Bachelor of Business and Environmental Science. Study the effects of human behaviour on climate and learn to lead sustainable business practices.

Integrate environmental science with the ability to create sustainable and competitive business practices. Focus on sustainability principles in tropical contexts in our internationally renowned centres of tropical environmental science.

Learn how to critically appraise environmental practices in international, regional, and local organisations. Support your research with genuine fieldwork and build a strong industry network through JCU's direct links to peak industry bodies.

“I choose to study at JCU because of its world class education and location – warm and sunny weather all year long, and right on the Great Barrier Reef! On graduation, I hope to get a job within sustainability consulting or investment banking in Australia or England.”

BACHELOR OF BUSINESS AND ENVIRONMENTAL SCIENCE

“Public awareness of environmental issues is at an all-time high, and the job market internationally is mirroring this, with opportunities increasing every year. In this degree, students develop the skills to deal with complex environmental science concepts and common challenges. Graduates will have an edge in the job market, as they can demonstrate they understand not only fundamental business principles, but also how to apply these alongside the rigorous environmental standards that consumers expect in today’s commercial climate.”

SENIOR LECTURER, ENVIRONMENTAL SCIENCE

Career Opportunities

JCU Business and Environmental Science graduates have highly respected qualifications in sustainable, successful, and vitally important business practices.

Graduates pursue a range of business careers, including in environmental policy, marine resource management, and aquaculture.

You could find employment as an environmental advisor, consultant, or academic in both private and public sectors.

JCU Accommodation

Study and live in some of the most interesting places in the world. Cairns and Townsville are on the doorstep of the Great Barrier Reef, magnificent rainforests, the savannah region and Outback Australia.

Living on-campus is a great way to make the most of your time at JCU. JCU Townsville, Bebegu Yumba campus, Douglas, has five different accommodation options housing over 1,300 students. JCU Cairns, Nguma-bada campus, Smithfield, features an accommodation complex for 300 students. Living on-campus is a great place to make new friends and immerse yourself in the JCU culture. All rooms at our on-campus residences are single board, with a single bed, study desk, chair, fan, air-conditioning and Wi-Fi. Each residence is different in regards to style of living, culture and atmosphere. There are options for fully catered or self-catered housing. Find out more at
